Projects

Mess Management System
- **Tech Stack:** MongoDB, React Js, Express Js and Node Js
- Frontend Development using ReactJs to create an interactive, intuitive, and responsive website.
- Add 5-10 extra features for inventory management, tracking expenses and displaying sales charts.
- Backend implementation built using NodeJs and ExpressJs to handle API integration and database operations.
- Leveraged MongoDB for scalable data storage and management, implemented MongoDB aggregation pipeline for data analysis.

Online Job Portal
- **Tech Stack:** HTML, CSS, JavaScript, PUG, Node Js, Express Js and MongoDB.
- Frontend Development: Employed HTML, CSS, JavaScript and PUG for more efficient and maintainable code .
- Backend Development: Used Express Js and Node Js to manage user authentication and Job posting.
- Database management: Chose MongoDB for data storage, ensuring efficient handling of user profiles and applications.

Modified Tiffin Service
- **Tech Stack:** HTML, Tailwind CSS, JS, PHP, MySQL
- Frontend Developed using HTML, Tailwind CSS and JavaScript for responsive and user-friendly interface.
- Backend Development: Built robust services using PHP for user authentication and order management.
- Designed and optimized MySQL database schema for fast data access and retrieval.

Education

Bachelor of Engineering - Computer Engineering
Government Engineering College , Gandhinagar

📅 10/2020 - 06/2024   CGPA: 8.35

Relevant Coursework: Object Oriented Programming, DBMS, Data Structures and Algorithm, Discrete Maths, Computer Networks, Operating Systems, Data Mining, Machine Learning and Artificial Intelligence.

Internship

Frontend Developer - Crystegraphy | 01/2024 - Present

- Developed a frontend part of Learning management system with 3 distinct interfaces.
- Applied SOLID principles to ensure scalable and maintainable code architecture.
- Integrated backend APIs using Axios for user authentication and data fetching, implemented cookie functionality for remembering login credentials.
- Created custom hooks to handle login functionality and fetch details, enhancing code modularity and readability.
- Utilized UI and chart libraries to create an interactive Dashboard for tracking expenses and sales.

Technical Skills

Frontend - HTML, SCSS, JavaScript, React Js, Redux, Typescript .

Backend - PHP

Databases : MySQL

Frameworks: Tailwind CSS, Bootstrap.

Tools & Concepts: Data Analytics, Git & Github, Postman, Figma, Canva, MS Office

Non-Technical Skills

- Teamwork and Collaboration
- Quick Learner
- Honesty
- Decision Making

Awards

- **2nd Runner-up in HACK VGEC**

Languages

- English
- Hindi
- Gujarati
